

Fahrenheit

A large, jagged iceberg floats in the center of the frame, its surface textured with ridges and shadows. In the background, snow-capped mountains rise against a pale, overcast sky. The water in the foreground is calm with gentle ripples.

accounting
made
simpler

A photograph of a desk with a laptop, mouse, and papers, with six colored circles overlaid containing text. The circles are arranged in two rows of three. The top row circles are green, olive, and dark grey. The bottom row circles are dark green, orange, and teal. The background shows a window with plants and a desk with a laptop, mouse, and papers.

EASY TO USE

Ease-of-use is the #1 focus of the Fahrenheit software project. That means having the things you need in places where you can find them and built in ways that make sense for you when you're using them. It also means having the tools you're used to using. And it means listening to your needs and wants – let us know which features you'd like to see added!

This is Fahrenheit... made for you

Made in America

Fahrenheit isn't accounting software developed for another country, with American tax systems tacked on. It's designed from ground-up with this set of business practices, terminology, and ways of thinking in mind. That means that you don't waste valuable brain space learning how to coerce foreign software into handling American processes.

Transfer documents quickly

Fahrenheit allows you to print, export to PDF, and email all directly from an Invoice record, so that you can get customers the data they need and get back to work.

Carefully crafted entry flow

Your time matters to us. That's why we've invested in a user interface that allows you to navigate between related documents quickly

Own your data

If you commit to a cloud accounting system, the vendor of that system controls your data and can tell you what you can and can't do with it. In addition, if their server or your internet has an outage, you're no longer able to work because you can't access your software or your data. With Fahrenheit, your data is stored onsite; you control it.

If you use a software sold on a subscription model, and then decide that the software no longer meets your needs, you are locked in, because if you cancel the subscription, you no longer can use the software to access your data. With Fahrenheit, you purchase a perpetual license that will continue to work even if you never pay us another penny.

easy to learn MATTERS

If something works well in one place, it should work well in other places, too. Fahrenheit is built from the ground up with the principle that you shouldn't have to re-learn how to work when you switch from Invoicing to Billing, or from Estimating to Invoicing, or from Customers to Vendors.

It's hard to switch your accounting software, but it shouldn't have to be as hard as it often is. That's why we're carefully crafting a library of free training materials to help you get up to speed as fast as possible. Support plans are also available if you'd like a helping hand to get up to speed with the software.

Search nearly anything – from nearly anywhere. No more fumbling around opening the Items window to figure out what the product ID is, or having to open Customers to see just which John Smith you're working with – just type to search.

flexibility
MATTERS

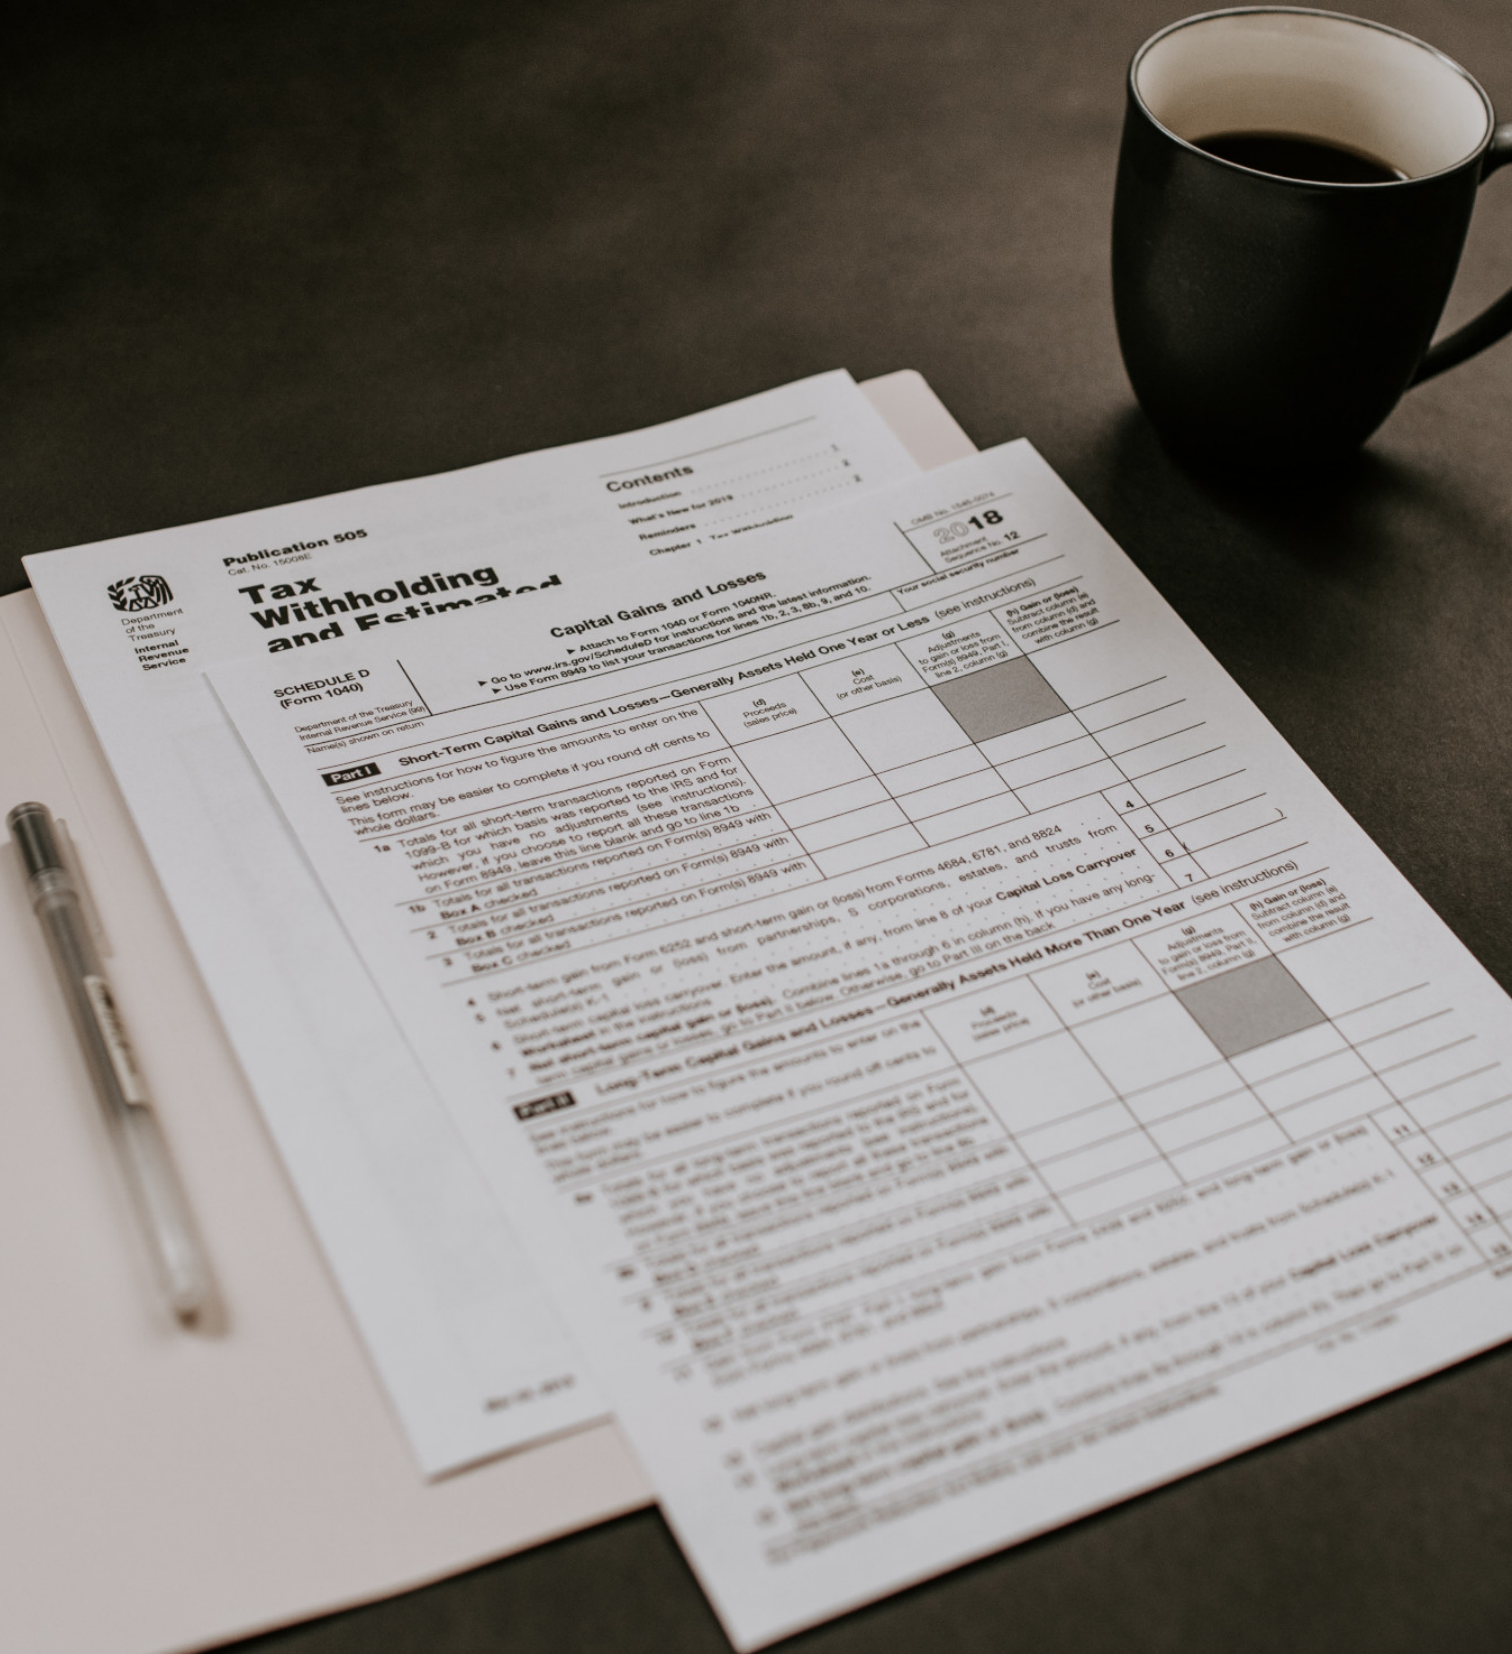

Create your own workflow; use varying document types, like Invoices, Sales Orders, and Estimates, along with Bills and Purchase Orders, to manage customer relationships the way that works best for you, and for your company. Pull Sales Order, Estimate, and Purchase Order items in by line item, or by document with Fahrenheit's Instant Launch.

Manage varying sales taxes

Handle tax-exempt sales by entire invoice or by line item. Change the tax schedule of the entire invoice with an easy menu, or enter line items to change their tax status. Line items can be configured to either follow the tax schedule of the main invoice or to maintain their own tax schedule when the main invoice is changed.

Advanced Discounting

Apply a percentage discount across the board including tax, or manage line item discounts on individual items. Or use Item Categories with Price Levels to selectively discount only portions of an invoice—automatically! Assign Price Levels to specific customers or apply per-invoice.

Work alone, or together

We believe that if you're doing all your accounting from one computer, you shouldn't have to turn into a technical expert and learn to configure SQL databases, application servers, and network setups. With Fahrenheit, you just install, and get to work!

Your books are even stored where you choose on your hard drive (through a normal save window) so you can back up using the same familiar methods you use to back up your documents and photos.

As your business grows and you need multiple people working with your file at one time, we've got you covered there too, with a quick-to-setup networked server based on industry-standard technologies.

Editions and Pricing

Fahrenheit 2024 Premier

Premier is our top-of-the line product, including invoicing, vendor bill management, purchasing and sales document flow options, credit memos and vendor credits, advanced discounting, terms, billable items, job costing, time tracking, banking, and more.

Premier for Single Computer

\$700 for a perpetual license

Fahrenheit 2024 Express

Express brings Fahrenheit's carefully crafted business management system to personal bookkeeping and very small businesses. It includes the banking section of Fahrenheit, with management of checking, savings, and credit card accounts, as well as basic invoicing (with sales tax management) and powerful standard accounting reports.

\$100 for a perpetual license

Optional add-ons:

- + \$15/year for access to upgrades (+ \$40/yr to receive physical media)
 - Includes 5 support tickets
- + 15/year for additional 5 support tickets

Important Note

Software purchase and/or support/maintenance subscriptions do not include data entry, accounting services, bookkeeping services, tax advice, setup or extensive training, at Fahrenheit's discretion.

Setup and training (both optional) are billed at \$75/hour. Support for those without a support subscription is available at the same rate.

Support tickets are valid for one year after purchase of the subscription in which they were included; unused tickets do not roll over.

All prices and details subject to change without notice at any time.
